Page 53, lines 30-31, change "PCT patent application WO 93/10503" to -- U.S. Patent No. 5,453,601.--

In the Claims:

Please cancel claim 1.

Please add the following new claims:

12.   An electronic transaction apparatus comprising

a host processor;

a first electronic unit that stores electronic money and that is programmed to include a transaction log function that maintains a log of electronic money transfers completed by said first electronic unit during purchase transactions; and

a second electronic unit programmed to include a transaction log function that maintains a log of data from said purchase transactions describing items purchased.

13.   The apparatus of claim 12, wherein a list of purchases from said second electronic unit is analyzed at a time after said purchase transactions.

14.   The apparatus of claim 12, wherein said second electronic unit connects to an accounts payable system.

15.   The apparatus of claim 12, wherein said second electronic unit connects to a purchase order system.

16.   The apparatus of claim 12, wherein said first electronic unit is a money module and said second electronic unit is a trusted agent.

17.   An electronic purchase transaction method, comprising the steps of:

sending electronic money from a first transaction device to a second transaction device during purchase transactions;

storing in said first transaction device electronic money transfer data during said purchase transactions; and

storing in said first transaction device data from said second transaction device describing items purchased.
